

OBJECTIVE

This portfolio comprises sustainable investment vehicles including unit trusts, mutual funds and exchange traded funds (ETFs), whose managers aim to outperform their respective markets. Asset classes you could find in this portfolio are equities, corporate bonds, alternatives, commodities and cash. Absolute return, multi-asset and property may all feature within the alternatives classification.

Sustainable World Defensive seeks to generate modest returns higher than cash in the bank over the short to medium term (3 to 5 years or more) with potential for consistent though constrained capital growth. The portfolio has a more defensive approach to equity exposure compared to Sustainable World Cautious - typically comprising 10% equity and 90% non-equity - though weightings may deviate within set parameters, allowing our managers to react to market conditions.
