

OBJECTIVE

In contrast to our portfolios of active investment products, this TAM Passive portfolio comprises solely passive investment vehicles (such as unit trusts and exchange traded funds) that track a market and aim to deliver returns reflective of how that market is performing. Asset classes you could find in this portfolio are equities, government bonds, corporate bonds, alternatives, exchange traded commodities and cash. Property may feature within the alternatives classification.

Passive Cautious seeks to generate modest capital growth higher than bond based returns over the short to medium term (3 to 5 years or more) by employing a more cautious investment strategy than Passive Balanced. The portfolio will have a modest approach to equity exposure - typically comprising 30% equity and 70% non-equity - though weightings may deviate within set parameters, allowing our managers to react to market conditions.

TAM RISK RATING: LOW TO MEDIUM
